

Estate Pilot

— Smart Real Estate Management Platform —

— Powered by **Techboloy** —

Complete Digital Solution for
Modern **Real Estate**
Businesses

About EstatePilot

EstatePilot is a complete cloud-based **Real Estate Management Platform** developed by **Techboloy** to help real estate companies digitize and streamline their entire business operation. Whether you **manage residential projects, commercial properties, plots, or apartment sales**, EstatePilot empowers your team with a centralized platform for managing everything efficiently.

Mission

To simplify real estate business management through smart technology.

Vision

To become one of the leading real estate software platforms for property developers and real estate companies.

Business Challenges

Is Your Business Facing These Challenges?

Many real estate companies still rely on spreadsheets, manual paperwork, and disconnected systems, leading to inefficiency and lost opportunities.

Common Challenges:

Customer information scattered across multiple files

Difficult booking management

Installment tracking complexity

Payment mistakes

Slow report generation

Team communication issues

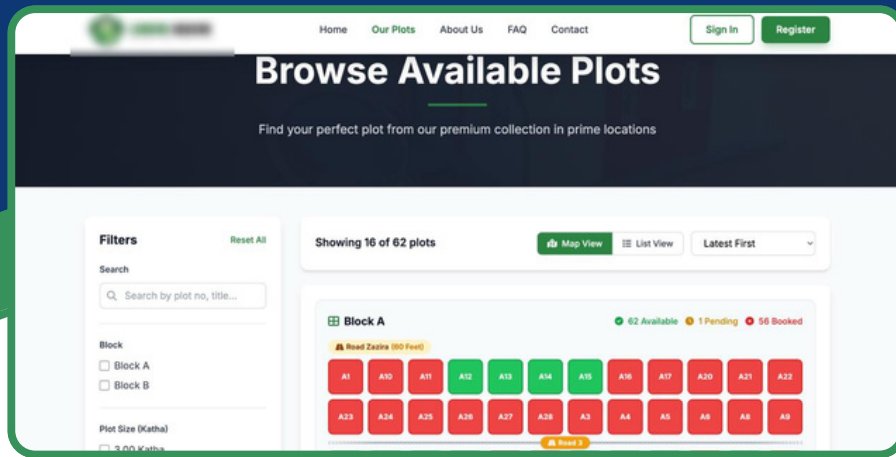

Manual invoice preparation

No centralized dashboard

EstatePilot solves all these challenges from one secure platform.

Why EstatePilot?
